Profile

I am a second-year Information Technology student at Metropolia University of Applied Sciences, specializing in software engineering and minoring in cybersecurity. I have experience in project execution, such as network configuration, software applications and web applications. Additionally, I thrive in collaborative environments and excel at problem-solving.

Education

Bachelor of Engineering in Information Technology   2023 - Present
Metropolia University of Applied Sciences, Helsinki

Vocational Qualification in Business and Administration (Merkonomi), Financial Administration
Business College Helsinki   2015 - 2018

Skills

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Python, Java
- **Databases:** MySQL, MariaDB, MongoDB
- **Web Development:** React.js, Vue.js, Express.js
- **Cloud Services:** Microsoft Azure
- **Version Control:** Git
- **Styling Libraries and CSS:** Bootstrap, Milligram, Tailwind CSS
- **Operating systems:** Foundational knowledge in Linux (installation, configuration and system administration)
- **Adobe Tools:** Proficient in Adobe Photoshop and Illustrator with strong foundational skills in both
- **UI/UX Design:** Experience in designing user-friendly and visually appealing interfaces

Cybersecurity Skills

I have a strong foundation in cybersecurity, having completed courses in Cybersecurity, Cybersecurity Operations, and Ethical Hacking. I am familiar with network security principles, threat detection, and incident response. Additionally, I am gaining hands-on experience with tools like Splunk, Linux and Cisco and actively working on expanding my knowledge through labs and certifications like CISSP"

This will make you stand out more to hiring managers. Let me know if you want to tailor it further!

Networking Expertise

I have hands-on experience in installing and maintaining wireless networks, including configuring **ASUS RT-AX53U routers**. I am proficient in **Cisco networking technologies**, including router and switch configurations, VLANs, and routing protocols such as OSPF and EIGRP. I have a solid understanding of networking fundamentals, including **TCP/IP, DNS, DHCP,** and **NAT**. Additionally, I have worked with IoT integration, setting up **MQTT** communication between Raspberry Pi devices in wireless networks. I am also familiar with network simulation tools like Cisco Packet Tracer to design and test network configurations.

Interpersonal Skills

- **Strong customer service** skills and ability to perform in busy environments (experience as a sales security officer and event security)
- **Excellent prioritization and communication** skills developed through projects and financial administration roles

Work Experience

Sales Security Officer (Salesperson / Security Guard)

Leinonen Suomi Oy
2017 - 2018

- Provided customer service in Finnish and English at retail store checkout counters
- Managed cash transactions and maintained accuracy in sales activities
- Assisted in general store maintenance and inventory tasks
- Enhanced daily processes and supported sales optimization efforts

Financial Administration Assistant

Reila Palvelut Oy
2019 - 2020

- Assisted in bookkeeping tasks, including bank statement reconciliations and preparing financial records
- Provided customer service and correspondence in Finnish and English
- Participated in handling and archiving financial documents, ensuring up-to-date records
- Supported invoice management and preparation of sales invoices
- Compiled and reviewed financial reports and analyses, supporting monthly reporting processes

Event Security Officer

HKI Events
2020 - Present

- Delivered customer service in a fast-paced event environment in Finnish and English
- Ensured the overall safety of event areas and maintained event security
- Managed payment terminals and cash flows at events
- Provided customer support and guidance at event locations
- Handled general maintenance tasks, such as preparing event spaces and implementing safety measures

Projects

Airplane Quiz Game

Developed an interactive airplane-themed quiz game where players create their usernames to log in and participate in quiz challenges. Players earn coins for each correct answer, enabling them to "travel" to different locations worldwide. Upon reaching a new destination, players face unique location-specific challenges complemented by real-time weather updates, offering an immersive experience.
Technologies used: Python, JavaScript, SQL, CSS, HTML

Fitness Supplement Full-Stack Web Application Store

Developed a responsive full-stack web application for users seeking high-quality supplements. The online store adapts seamlessly to mobile users, providing an optimized shopping experience across devices. The backend is built using Node.js and TypeScript, ensuring a robust and reliable foundation. MySQL is the primary database, supplemented by MongoDB for special use cases. The frontend utilizes Tailwind CSS and JavaScript, creating a clean, attractive, and responsive user interface. The goal is to offer fitness-focused customers a reliable and user-friendly way to explore and purchase high-quality supplements.

Technologies used: JavaScript, SQL, MongoDB, CSS, HTML, Tailwind CSS

Real Estate Web Application

Developed a real estate web application similar to Oikotie.com, tailored for the Balkan market. This platform connects property buyers, sellers, and renters, offering a seamless user experience for browsing and listing properties. The application is built using the MERN stack, ensuring a dynamic and responsive interface while maintaining robust backend functionality.
Technologies used: MongoDB, Express, React.js, Node.js

Languages

- **Finnish:** Native
- **English:** Fluent
- **Albanian:** Fluent
- **Swedish**: Basics

Hobbies & Interests

I'm passionate about football, basketball, and MMA, and recently started training in Brazilian Jiu-Jitsu, which has sharpened my **creativity under pressure**.

As a former football team captain, I developed leadership skills, **teamwork**, and the ability to **motivate** others.

I also enjoy graphic design, creating logos, and building brand identities for startups with a focus on **simplicity**, **clarity** and **innovation**.
